

16: Other Places to Use Lava

About Those Exercises...

This session won't have exercises – it will mostly be showing you other blocks and pages where you will frequently use Lava.

You can always use rockrmsdemo.com to look at these and other core features.

Showing Content Channel Items

No need to build the feature from scratch- we have a block just for this.

Content Channel View Block

The screenshot shows a content channel view block on a laptop screen. The block is divided into two main sections, each featuring a thumbnail, a date, a title, and a snippet of text.

Top Section:

- Thumbnail:** An orange square containing the white logo icon and the text "ROCKCAST".
- Date:** October 16, 2024
- Title:** **Podcast Episode 181: What's coming to Rock and updates at Spark**
- Text:** Join Jon, Nick, and Emily as they discuss updates coming soon in Rock. Learn more about Rock'n Roadshows, as we hope to have many throughout the country with a brand new presentation. Also, hear about the new hires we have made over the last few months and the changes you can expect with them! [Read more >](#)

Bottom Section:

- Thumbnail:** An orange square containing the white logo icon and the text "Fundraising Update".
- Date:** October 1, 2024
- Title:** **Donation Rate Increase Postponed to 2026**
- Text:** Due to an increase in community giving, we have decided to

The map displays a comprehensive view of the Phoenix area, including Sun City West, Surprise, Peoria, and surrounding towns. Key landmarks include Christ's Church of the Valley (CCV) - Peoria, Thunderbird Conservation Park, Arrowhead Lakes, and various shopping centers like Arrowhead Towne Center and WinCo Foods. The map also shows the Rio Grande River and several major roads such as I-10, I-17, and State Route 87.

Series Partitions

This Metric already has some values. If you are changing Metric Partitions, you might have to manually update the metric values to reflect the new partition arrangement.

Label	Type	Is Required
Region	Group	X
		+

Metrics

There are several ways to design your Lava to populate the Metric Values. If you use the 'Lava' source type option, the results will be stored with the date of the date when the Calculation is scheduled.

Example #1

Simple metric with the default partition

- The output will be the YValue

Lava Template:

```
{% attendance where:'DidAttend == true && GroupId == 56' count:'true' %}  
  {{ count }}  
{% endattendance %}
```

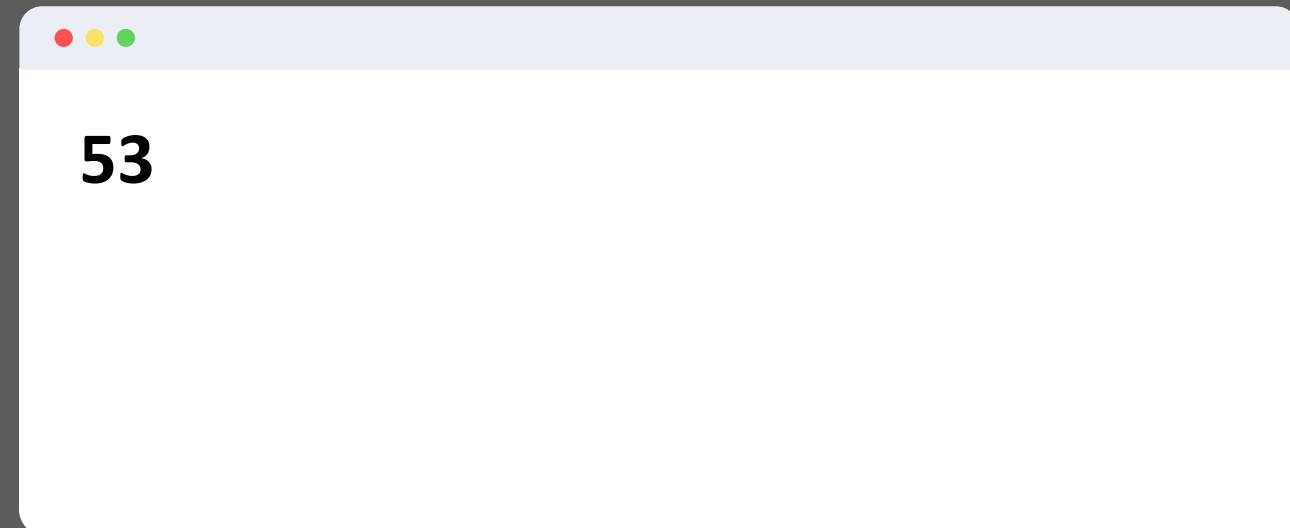

Lava Output:

```
15052
```

Metrics

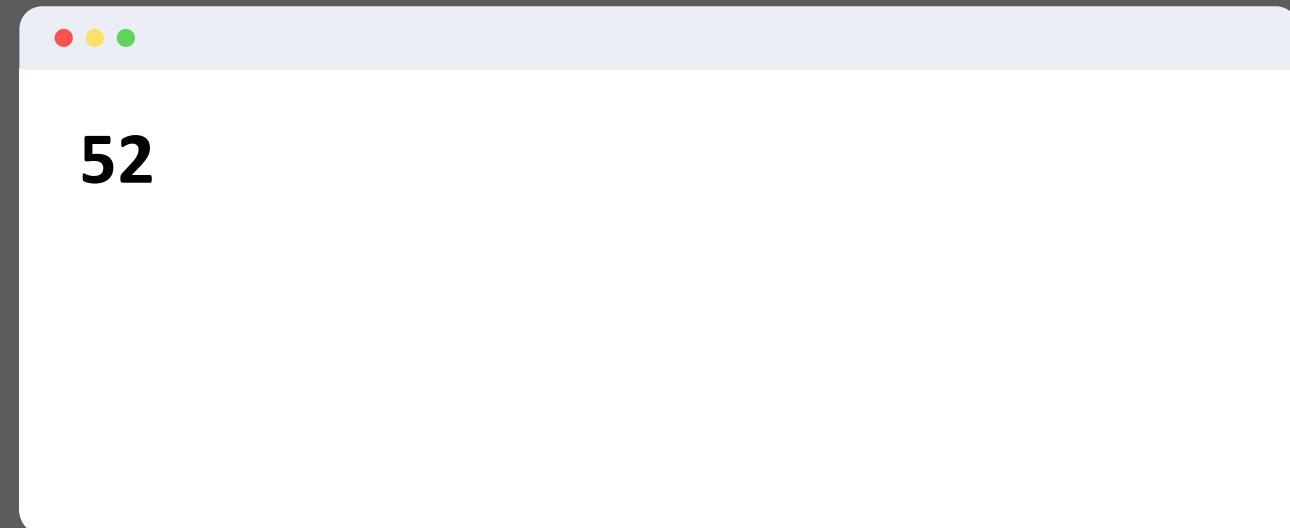

```
1  {% assign sundayDate = 'Now' | SundayDate %}  
2  {% attendanceoccurrence  
3      expression:'Group.GroupTypeId == "25" && Group.IsActive == "True"'  
4      where:'SundayDate == "{{ sundayDate }}"'  
5      select:'new (GroupId AS GroupId)'  
6      count:'true'  
7  %}  
8      {{ count }}  
9  {% endattendanceoccurrence %}
```

Metrics

```
1  {% assign sundayDate = 'Now' | SundayDate %}  
2  {% attendanceoccurrence  
3      expression:'Group.GroupTypeId == "25" && Group.IsActive == "True"'  
4      where:'SundayDate == "{{ sundayDate }}"'  
5      select:'new (GroupId AS GroupId )'  
6  %}  
7      {{ attendanceoccurrenceItems | Uniq | Size }}  
8  {% endattendanceoccurrence %}
```

Metrics

Example #2

Simple metric with a MetricValueDateTime specified

- The 1st Column will be the YValue
- The 2nd Column will be the MetricValueDateTime

Lava Template:

```
{% webrequest url:'https://api.github.com/repos/SparkDevNetwork/Rock/subscribe
    {{ results | Size }},{{ RunDateTime | SundayDate | DateAdd:-7 }}
    {% endwebrequest %}
```

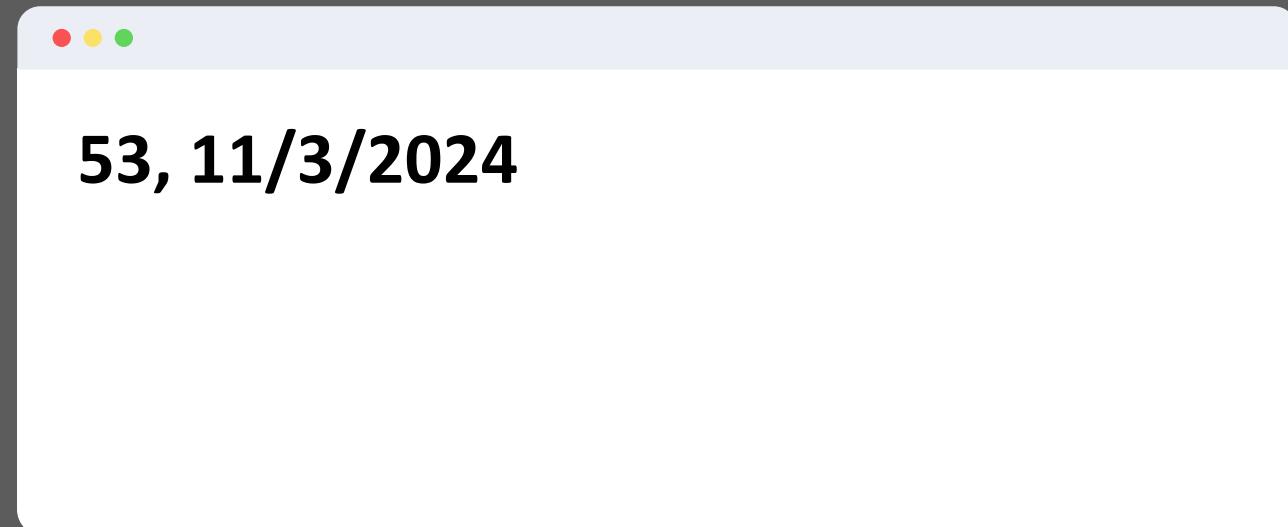

Lava Output:

```
30, 5/7/2016
```

Metrics

```
1  {% assign sundayDate = 'Now' | SundayDate %}  
2  {% attendanceoccurrence  
3      expression:'Group.GroupTypeId == "25" && Group.IsActive == "True"'  
4      where:'SundayDate == "{{ sundayDate }}"'  
5      select:'new (GroupId AS GroupId )'  
6      count:'true'  
7  %}  
8      {{ count }}, {{ sundayDate }}  
9  {% endattendanceoccurrence %}
```

Metrics

Example #3

Lava that returns a Count and EntityIds for each Partition

- The 1st Column will be the YValue
- The 2nd Column will be the EntityId of the 1st Partition
- The 3rd Column will be the EntityId of the 2nd Partition
- ...
- The Nth Column will be the EntityId of the (N-1)th Partition

Lava Template:

```
{% webrequest url:'https://api.example.com/statsByGroupAndCampus' %}  
    {% for item in results %}  
        item.Count,Item.GroupId,Item.CampusId  
    {% endfor %}  
{% endwebrequest %}
```

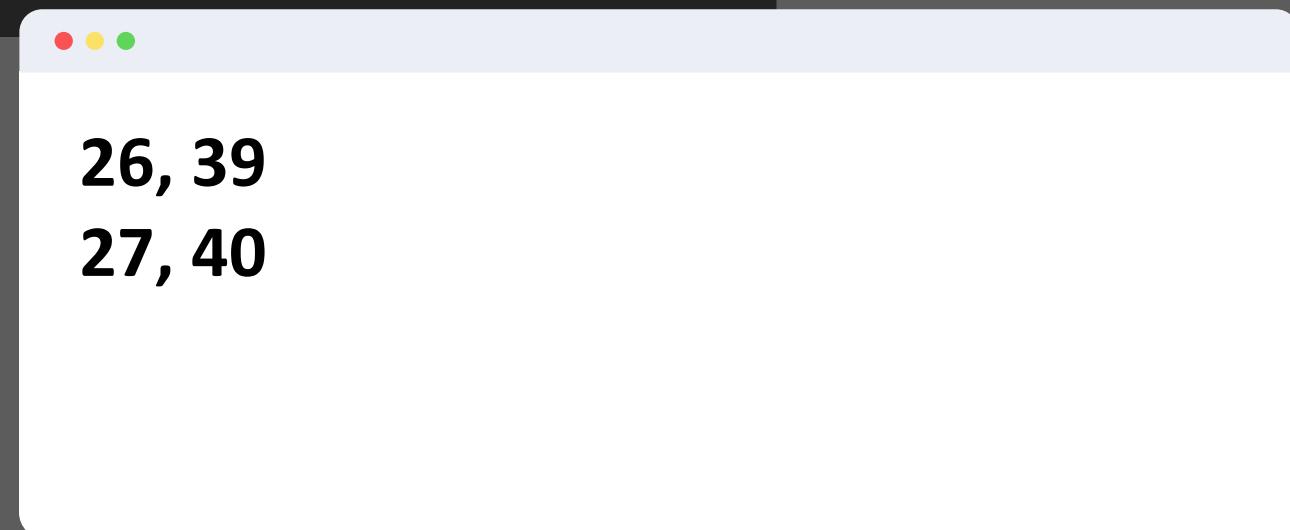

Lava Output:

```
30, 45, 2  
34, 45, 3  
36, 45, 4  
30, 46, 2  
34, 46, 3  
36, 46, 4
```

Metrics

```
1  {% assign sundayDate = 'Now' | SundayDate %}  
2  {% attendanceoccurrence  
3      expression:'Group.GroupTypeId == "25" && Group.IsActive == "True"'  
4      where:'SundayDate == "{{ sundayDate }}"'  
5      groupby:'Group.ParentGroupId'  
6      select:'new (Key as ParentGroupId, it.Count() AS GroupCount)'  
7      iterator:'parentGroups'  
8  %}  
9  {% for parent in parentGroups %}  
10     {{ parent.GroupCount }}, {{ parent.ParentGroupId }}  
11  {% endfor %}  
12  {% endattendanceoccurrence %}
```

Metrics

Example #4

Lava that returns a Count, Date and EntityIds for each Partition

Lava Template:

```
{% assign weekEndDate = RunDateTime | SundayDate | DateAdd:-7,'d' | Date:'yyyy-MM-dd'
{% webrequest url:'https://api.example.com/weeklyStatsByCampus?since={{ weekEnd
    {% for item in results %}
        item.Count, item.DateTime, Item.CampusId
    {% endfor %}
{% endwebrequest %}
```

Lava Output:

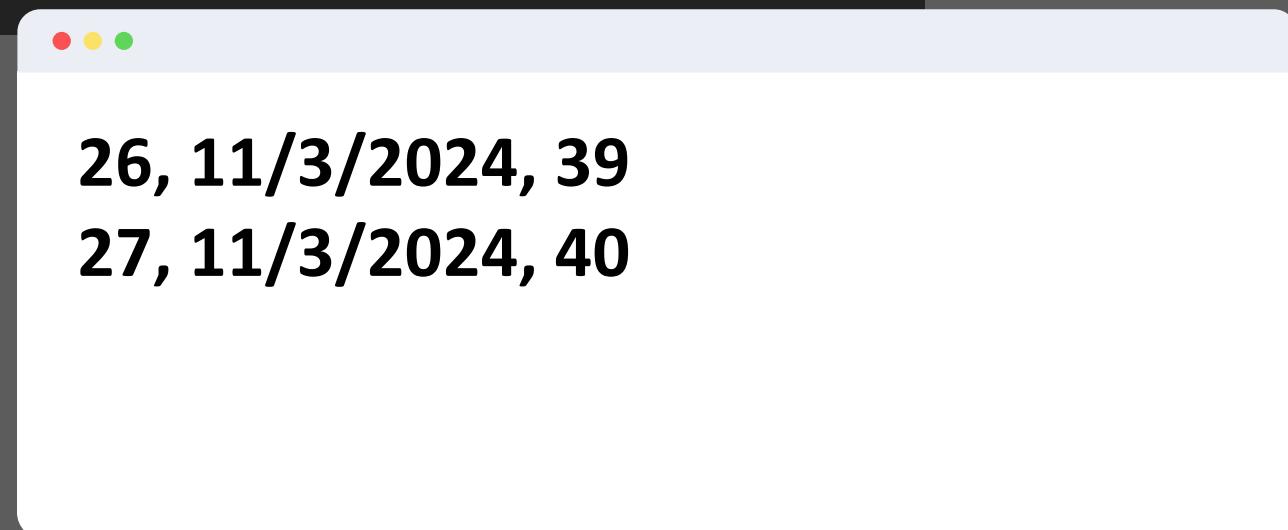

```
30, 5/7/2016, 2
34, 5/7/2016, 3
36, 5/7/2016, 4
30, 5/8/2016, 2
34, 5/8/2016, 3
36, 5/8/2016, 4
```

NOTE: If a [MetricValueDateTime] is specified and there is already a metric value, the value will get updated. This is handy if you have a weekly metric, but schedule it to calculate every day.

Metrics

```
1  {% assign sundayDate = 'Now' | SundayDate %}  
2  {% attendanceoccurrence  
3      expression:'Group.GroupTypeId == "25" && Group.IsActive == "True"'  
4      where:'SundayDate == "{{ sundayDate }}"'  
5      groupby:'Group.ParentGroupId'  
6      select:'new (Key as ParentGroupId, it.Count() AS GroupCount)'  
7      iterator:'parentGroups'  
8  %}  
9  {% for parent in parentGroups %}  
10     {{ parent.GroupCount }}, {{ sundayDate }}, {{ parent.ParentGroupId }}  
11  {% endfor %}  
12  {% endattendanceoccurrence %}
```

The screenshot shows a website's 'Connect' section. At the top, there's a navigation bar with links: 'New Here?', 'Resources', 'Connect', 'Give', 'Blog', 'Calendar', and 'Watch'. Below this is a secondary navigation bar with links: 'Home / Connect', 'Children', 'Students', 'Adults', 'Prayer', 'Missions', 'Serve', 'Small Groups', 'Contact Us', 'Subscribe', 'Family Pre-Registration', and 'Sign-Ups Finder'. The main content area has a large orange header with the website's logo. To the right of the header is a sidebar with five icons: a document, a person, a coin, a wrench, and a briefcase. Below these icons are five cards: 'Check-in Configuration' (with a checked checkbox icon), 'Named Locations' (with a location pin icon), 'Schedules' (with a calendar icon), 'Devices' (with a computer monitor icon), and 'Check-in Labels' (with a printer icon). At the bottom of the sidebar are three more cards: 'Ability Levels' (with a person icon), 'Label Merge Fields' (with a tag icon), and 'Search Type' (with a magnifying glass icon).

Page Menu Block

The screenshot displays a website interface with a dark gray header bar at the top. On the far left, there is a vertical navigation bar with a dark gray background and a thin orange border on its left side. This bar contains five icons: a document, a person, a wallet, a wrench, and a briefcase. The wrench icon is highlighted with an orange border. To the right of the navigation bar is a light gray content area. At the top of this area, there is an orange header bar with rounded corners. On the left side of this orange bar is a white circular icon containing a white 'R' shape. To the right of the icon are three small gray rectangular buttons with rounded corners, each containing a white icon: a bell, a bookmark, and a magnifying glass. Further to the right is a search bar with the placeholder text "Search ▾". On the far right of the orange bar is a user profile picture of a woman and a small downward-pointing arrow.

Page Menu Block

The screenshot shows a web application interface with a dark-themed sidebar and an orange header bar.

- Header Bar:** Contains a logo icon (white 'R' in a circle), three small icons (bell, bookmark, search), a "Search" input field with a dropdown arrow, and a user profile picture.
- Page Content:** The main area is titled "Class Demo" with a breadcrumb trail: "Home > Power Tools > Class Demo".
- Sidebar:** A vertical dark sidebar on the left features five icons with horizontal lines:
 - Document
 - User profile
 - Cash
 - Wrench (Tools)
 - Folder (highlighted with an orange border)
- Content Area:** Displays two rectangular cards:
 - May The Force:** Features the Star Wars logo icon.
 - Live Long:** Features a hand icon.

Page Menu Block

The screenshot shows the Rivet CMS File Manager interface. The left sidebar has icons for Home, CMS Configuration, and File Manager, with File Manager selected. The main area is titled "File Manager" and shows the path "Home > CMS Configuration > File Manager". The left sidebar also includes icons for Themes, Assets, and Lava.

The central area displays a grid of files:

- Themes:
 - CheckinAdventureKids
 - CheckinAero
 - CheckinBlueCrystal
 - CheckinElectric
 - CheckinPark
 - DashboardStark
 - Flat
 - KioskStark
 - LandingPage
 - Rock
- Assets:
 - Lava

Files listed in the grid include:

- NoteViewItem.java
- NoteViewList.java
- OpportunityDetail.java
- OpportunityResult.java
- OpportunitySearch.java (highlighted with a red box)
- PageListAsBlock.java
- PageListAsPills.java
- PageListAsTabs.java
- PageListProfile.java (highlighted with a red box)
- PageNav.java
- PageSubNav.java
- RegistrationList.java (highlighted with a red box)

An orange "Upload File" button is located in the top right corner of the file list area.

Page Menu Block

The screenshot displays a website interface with a dark-themed sidebar on the left and a light-colored main content area. The sidebar features a vertical navigation menu with five items: a document icon (highlighted with an orange bar at the bottom), a user profile icon, a gear icon, a wrench icon, and a briefcase icon. The main content area has a header with the title "Class Demo" and a breadcrumb trail "Home > Power Tools > Class Demo". Below the header is a search bar with icons for bell, bookmark, and magnifying glass, followed by a "Search ▾" button and a user profile picture. The main content area contains two buttons: "May The Force" and "Live Long".

Page Menu Block

The screenshot shows the 'File Editor' interface within a CMS configuration system. The left sidebar features icons for Home, CMS Configuration, File Manager, and File Editor. The main area displays the 'File Content' of a file named 'PageMenuBlock.cshtml'. The code is a C# Razor template for generating a page menu. It includes logic for child pages and included pages, using hrefs, titles, and icons.

```
1 <div class="panel panel-default list-as-blocks clearfix">
2   <div class="panel-body">
3     <ul>
4       <% for childPage in Page.Pages -%>
5         <li>
6           <a href="{{ childPage.Url }}" &% if childPage.DisplayDescription != 'true' %> title="{{ childPage.Description }}" &% endif %>
7             &% if childPage.IconCssClass != '' %>
8               <i class="{{ childPage.IconCssClass }}></i>
9             &% endif %>
10            <h3>{{ childPage.Title }}</h3>

16    {% endfor %}
17 </div>
```

The screenshot shows a user interface with a sidebar on the left containing icons for a file, user profile, and other tools. The main area displays a "Class Demo" page with the URL "Home > Power Tools > Class Demo". Two cards are visible: one titled "May The Force" with a Star Wars icon and another titled "Live Long" with a hand icon. Each card has an orange "Go" button at the bottom.
